

RoyIntelli Technology Co., Ltd.
RI-IRS3600 | Automatic Infrared Sulfur Analyzer
Category: Sulfur Analysis
Buyer datasheet | Version 1.0 | 2026-09-24

Purpose and sample types

- Coal, coke, solid biomass
- GB/T 25214-2010; ASTM D4239 (equivalent method)
- 24 samples; about 120 s per sample
- Range 0.01-20%; resolution 0.001%; furnace 1350 C
- Infrared absorption; automatic weighing and feeding; Ethernet/LIMS interface
- Factory documents, English manual and remote commissioning are available according to the confirmed order

Ordering checklist

- Confirm sample matrix, daily throughput, reporting standard, voltage and plug format.
- Request the model-specific quotation, acceptance protocol and available evidence pack.
- Final specifications, documents, lead time, warranty and payment terms are confirmed in the Proforma Invoice.

Documents and support

- English operating documentation and remote commissioning are available according to the confirmed order.
- CRM reports, calibration records, conformity documents and reference material are supplied or made available only when applicable and verifiable for the ordered model.
