

RoyIntelli Technology Co., Ltd.
RI-S320 | Automatic Horizontal Coulometric Sulfur Analyzer
Category: Sulfur Analysis
Buyer datasheet | Version 1.0 | 2026-09-24

Purpose and sample types

- Coal, coke, oil, solid biomass
- GB/T 214-2007; GB/T 28732-2012; ISO 16994:2015
- 20 samples; 3-5 min per sample
- Sulfur range 0.01-40%; resolution 0.001%; furnace 1150 C for coal/coke
- Coulometric titration; self-diagnostics; open database for LIMS integration
- Factory documents, English manual and remote commissioning are available according to the confirmed order

Ordering checklist

- Confirm sample matrix, daily throughput, reporting standard, voltage and plug format.
- Request the model-specific quotation, acceptance protocol and available evidence pack.
- Final specifications, documents, lead time, warranty and payment terms are confirmed in the Proforma Invoice.

Documents and support

- English operating documentation and remote commissioning are available according to the confirmed order.
- CRM reports, calibration records, conformity documents and reference material are supplied or made available only when applicable and verifiable for the ordered model.
